Title: Protocols Requiring Review and Approval by IACUC and Another Regulatory Committee
Effective Date: July 16, 2008 **Revision # 04**
Standard Operation Procedure Number: **IACUC-RVW-022** **Last Committee Review: December 14, 2022**

Purpose

The purpose of this document is to describe the review and approval process for protocols requiring oversight by multiple regulatory compliance committees (IBC, IRB, CIRC).

Procedure

1. The electronic IACUC protocol requests information to indicate if approval by another regulatory committee is required. If approval is necessary, the ORC&S personnel will notify the respective administrator(s) of the other committee(s), that this particular protocol will require that committee's oversight. If approval has already been obtained from the other committee, a copy of the approval letter will be attached to the protocol.
2. If approval from the other committee(s) has not been obtained prior to this committee's review, the IACUC may approve the IACUC protocol; however, notification of IACUC approval will be withheld from the PI until approval is obtained by the other respective committee(s).
3. Notice that final approval has been granted will be communicated in writing to the PI.
